RCAMV 6 Deadman Handle

(Complete handle including items 1-9)

Used in conjunction with
Remote Control Metering Valve

Installation Instructions

The RM 21A Deadman Handle is designed for use with Hodge Clemco blast machines incorporating a remote control system. These instructions must be used in conjunction with those contained in the blast machine Owner's Manual.

WARNING: Ensure compressed air supply is turned OFF and disconnected prior to fitting.

1. Remove existing deadman handle & securely fit the RM 21A to the blast hose adjacent to the nozzle holder using hose ties.
2. Securely connect the 1/4" 'red' supply control hose to port R on the rear of the RM21A & the 1/4" 'yellow' signal hose to port Y.
3. Using tape or hose ties secure the control hoses to the blast hose at metre intervals to prevent snagging.
4. Check rubber insert is in good condition & correctly positioned.
5. Check handle lever operates freely.
6. Follow normal operating procedures in blast machine Owner's Manual.
