

Your solution, our job!

► **Find the Sprayer
that suits your needs!**

A guideline to Graco's solutions for Professional Contractors handling architectural paint & texture projects from small private to medium and large commercial job sites.

“ Very big, or very detailed. Very tough or more complex. Inside, outside, high in the air... it does not matter how your job site looks like, there is always one certainty: Graco helps you to find the solution you need. We want you to get the best result, increase your productivity and save time and money. Because that is our job. ”

Our mission is to facilitate your work on the job site, with professional units of the best quality. Also up-front we help you to select the right sprayer for your job. With the questionnaire here on the side you have a first idea, a guideline which units suits your job best.

Fine Finish

I paint

SMALLER OBJECTS

that need a perfect finish
Radiators, cabinets, ...

SMALL OBJECTS

for maintenance or touch-up
Up to 50 m²

BIGGER OBJECTS

that need a good finish as well as more speed
Doors, stairwells, ...

▶ **HVLP TURBOFORCE**

▶ **EASYMAX FF**

▶ **FINISHPRO II PC PRO**

HVLP TurboForce™

High-volume, low-pressure (HVLP) sprayers use a high volume of air to help break-up the paint and push it into the nozzle.

An additional low-pressure air stream is transmitted through the nozzle, meeting the paint creating a fine, mist-like spray pattern. This results in a sprayer that produces minimal overspray, making it a good choice for interior or detail work.

HVLP sprayers also provide the highest level of transfer efficiency. This means more paint reaches the spraying surface, resulting in less masking and dust sheet usage.

HVLP TurboForce 9.5

ACCESSORY: HVLP ProComp

Fine Finish

► EasyMax™ FF

The EasyMax can be used as a maintenance gun to repaint objects, to repair walls sprayed before with a normal paint sprayer, to spray paint jobs up to maximum 50 m². The ideal tool to spray rooms with different colour walls, ceilings, (garage) doors, radiators, cabinets, carpports, garden sheds, fences, staircases, furniture (new or renovation), etc...

An airless unit to spray water- and solvent based lacquers.
Ideal to use for smaller objects or a second colour up to 50m² a day.

► FinishPro™ II PC Pro

Some contractors claim that AAA (Air-Assisted Airless) is slower than airless, not realizing that if you turn-off the compressor on an AAA and turn up the fluid pressure, you are essentially running a 225 bar airless machine.

The Air-Assist simply gives you the ability to run products efficiently in lower pressure ranges, which is desirable for fine finishes. And having a 18 liter supply capacity gives AAA a production advantage over HVLP on larger scale tasks, but with similar transfer efficiency and finish quality.

FinishPro II 595 PC Pro

Professional Airless

I paint

SMALLER INTERIOR JOBS

Professional Airless

► EasyMax™ WP II

The EasyMax can be used as a maintenance gun to repaint objects, to repair walls sprayed before with a normal paint sprayer, to spray paint jobs up to maximum 50 m². The ideal tool to spray rooms with different colour walls, ceilings, (garage) doors, radiators, cabinets, carports, garden sheds, fences, staircases, furniture (new or renovation), etc...

EasyMax WP II

ACCESSORY: ProPack™

► Ultra® Max II

The Ultra Max is the ideal unit for medium to large painting jobs, inside as well as outside! Your most reliable buddy for renovations, new construction, commercial and residential buildings, exterior facades, new housing projects, etc. It handles most common tip sizes and heavier coatings with ease! The Ultra® Max sprays perfectly acrylics, primers, emulsions, waterborne as well as solvent paints.

▶ **T-MAX**

▶ **RTX**

▶ **MARK MAX**

▶ **T-Max™**

The T-Max has been specifically designed to apply most interior plasters and fillers. Using the T-Max in combination with an external compressor, decorative plasters with particles up to 1.5 mm can also be sprayed. The T-Max has been tested and approved to spray the most demanding plasters, mixed or premixed, that are currently on the market.

T-Max 657

ACCESSORY: Mixing Kit

Texture

▶ RTX™

The RTX 1500 is packed with innovative features and performance points – designed for the professional texture contractor. The RTX 1500 is Graco's solution for the interior application of decorative materials. With its 57 liter hopper, the unit fits smaller to medium size projects to spray Simulated Acoustic, Drywall Mud, Elastomerics, Deck Coatings and EIFS / Synthetic Stucco materials. The RotoFlex™ HD Pump, in combination with the built-in air compressor, offers the ability to pass large aggregates without damaging them or the pump.

RTX 1500

ACCESSORY: Hopper Gun

▶ Mark Max

The Mark Max is a real multiple purpose unit for large painting jobs for the inside as well as the outside! Your most reliable buddy sprays airless plasters and most common paints. The Mark Max sprays latex, emulsions, acrylics, epoxies, blockfillers, fire retardants, intumescent and most common airless plasters. It even has enough performance to deliver the necessary flow for 2 people spraying simultaneously.

Heavy Duty Coatings

I apply

HEAVY DUTY COATINGS
for repair or touch-up

▶ **XFORCE HD**

**HIGH OUTPUT
HEAVY DUTY COATINGS**
(eg. water-proofing/roofing materials)
with long hose lengths and
freedom from electric power

▶ **GH BIG RIGS**

**PAINT, INDUSTRIAL COATINGS
and PREMIXED PLASTER**
with the flexibility to switch
between electricity and gas driven

▶ **DUTYMAX**

**PAINT, INDUSTRIAL COATINGS
AND PREMIXED PLASTER**
with a high powered gas engine

▶ **GMAX II**

▶ XForce™ HD

With the capability to quickly deliver a highly desired, one-coat airless finish, the XForce HD eliminates the need for multiple coats often required with messy brushes and rollers. This powerful handheld sprayer also eliminates the need to wet larger airless equipment just to spray small areas. It is the fastest way to complete small jobs and touch-up. Jobs that used to take hours to complete can now be completed in minutes – saving time, money and material.

XForce HD

▶ GH™ Big Rigs™

The GH sprayers are powerful hydraulic sprayers that allow you to spray a wide range of materials: from paint and airless plasters to roofing, waterproofing materials and protective coatings. Our compact entry level sprayer GH833 is ideal for high production professional contractors. The GH933 uses maximum pressure to handle the toughest industrial coatings. Our GH 733 / 933 / 1017 / 2570 / 5040 can be customized for a wide range of applications, trading off high pressure with high flow rates.

Heavy Duty Coatings

► DutyMax™

The DutyMax sprayers are powerful hydraulic sprayers for high production contractors spraying a wide range of materials from latex and acrylics to elastomerics on large residential and commercial jobsites. The DutyMax design has been optimized to efficiently spray the heavy duty materials such as plasters, bitumens, fire retardants and liquid roofing solutions. The DutyMax 300DI is robust, reliable and strong enough to support heavy duty jobs with heavy duty materials, even with 2 or 3 guns.

DutyMax Standard

DutyMax ProContractor

ACCESSORY: Container Suction Kit

► GMax™ II

The GMax is the ideal unit to spray a full range of coatings on residential, commercial and industrial jobs. The 5900 HD and 7900 HD, handle most common tip sizes and heavier coatings with ease! The GMax sprays perfectly acrylics, primers, emulsions, waterborne and solvent based paints. The HD version also handles most common anti-corrosive and fire retardant paints and airless plasters.
